

CASE STUDY FORM

Symptoms & Quality of Life Before Alignment Correction:

Sanya presented to the office after injuring her lower back after lifting a box. When she injured her back she could barely walk. She missed a couple days of work. She was unable to do many activities with her children, nor was she able to exercise.

Previous Medical Treatments:

Prior to coming into our office, Sanya had utilized chiropractic care to help with her back pain in the past. She has only had one other chiropractor before coming to our office.

Recommendation and Technique Used:

Sanya was recommended a 90 day care plan. Within that first 90 days, her treatment plan recommended consisted of frequent weekly visits, an alignment correction, and utilization of DNFT and Thompson technique.

Symptoms and Quality of Life After Alignment Correction:

After being under care, Sanya notes her quality of life has significantly improved because of the care she has received.

What Did You Think About NUCCA?:

Sanya states, "They are simply amazing! I highly recommend them for high quality chiropractic care!"
